

Mattito's takes the Coronavirus Disease (COVID-19) very seriously and has taken steps to provide a safer environment for our customers.

This includes keeping our staff at home if they are sick, even if it's a mild cold or allergies. We have also been consistently sanitizing fixtures, wiping down shared workspaces and diligently cleaning areas with customer interaction. Buffet food service has been modified to provide additional sanitation and protection. Our host station has hand sanitizer available and is greeting clients with a wave instead of a handshake.

We are remaining open at this time and do not plan to close in the future. However, we will update all of our customers immediately if this changes.

That being said, we understand that some customers may want to limit in-person contact and stay home. Remember that Mattito's can have food prepared for pickup or delivered through our website www.mattitos.com and through our delivery partners including Grubhub and Doordash.

Fortunately, we are able to handle new event, party and catering quotes virtually via our website, phone, and email. Our website can further be used to process payments and assist current customers. We can also be reached by calling us at 214-526-8181.

Clear-headed, calm, and generous, we will get through this, with God's help and the help of one another, near and far. From all of us at Mattito's we wish you well and hope to see you very soon.

Jeff Frankel,
Founder and President
